December 15, 1999

Dear Class of 2004,

I take great pleasure in informing you of your appointment to the first-year medical class at the Tulane University School of Medicine, to enter in August of 2000. I sincerely hope that you will accept our invitation to take your medical training at Tulane and look forward to having you join us.

In order to reserve your place in the class, we must receive, within the next two weeks, written notification of your intent to accept our invitation. At anytime between now and May 15, 2000, we must receive a check, payable to the Tulane Educational Fund, in the amount of \$500; this deposit will be credited against your first tuition billing. Please understand this deposit is non-refundable and should indicate your final decision to attend Tulane University School of Medicine. We ask that should you decide not to attend Tulane, you inform us in writing so that we can maintain an accurate accounting of our class.

I am sure you will understand that your appointment is contingent upon successful completion of the academic program in which you are currently enrolled, and maintenance of the level of academic performance that was part of the basis for your acceptance. A final transcript of your grades must be forwarded to this office as soon as your school year ends.

You will be receiving additional information concerning summer programs, combined-degree programs, and other topics of interest as the year progresses. I and others at the medical school will try to keep you well informed of all important or interesting topics.

On behalf of the students, faculty, and administration at Tulane, I bid you a most enthusiastic welcome. If I can be of service to you in any way, please feel free to call upon me.

Sincerely yours,

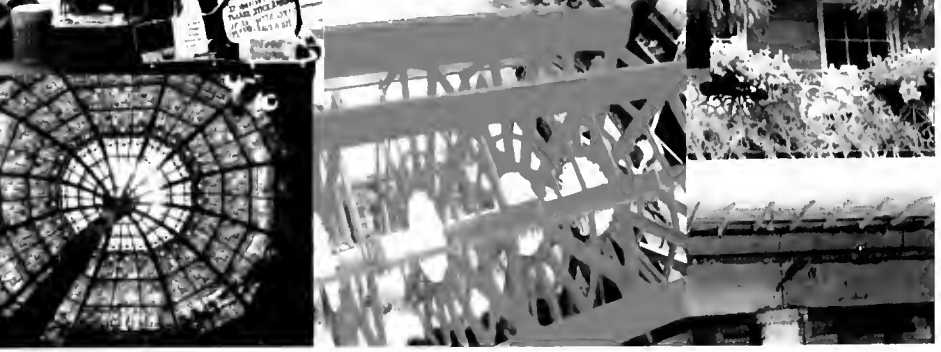

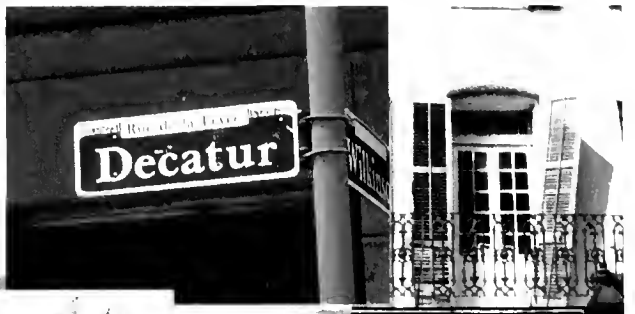

A handwritten signature in black ink, appearing to read 'J. Pisano'.

# THE OATH OF HIPPOCRATES

I swear by Apollo, the physician, and Aesculapius, and Health and All-Heal, and by God and by whatever I hold most sacred, that, according to my ability and judgment, I will keep this Oath and this stipulation—I will look upon those who shall have taught me this Art even as one of my parents. I will share my substance with them, and I will supply their necessities if they be in need. I will regard their offspring in the same footing as my own brethren, and I will teach them this Art, if they shall wish to learn it, without fee or covenant. I will impart a knowledge of the Art by precept, by lecture and by every mode of teaching not only to my own children but to the children of those who have taught me, and to disciples bound by covenant and oath, according to the Law of Medicine, but to none other. The regimen I adopt shall be for the benefit of my patients according to my ability and judgment and I will abstain from whatever is deleterious and mischievous. I will seek to inform my patients fully about their illness and prognosis, and will always remember that the final decision regarding their own life rests with the patient. I will regard my patients always as fellow human beings and will do everything possible to preserve their dignity. With purity and with holiness I will pass my life and practice my Art. Whatsoever things I see or hear concerning the life of men in my attendance, on the sick or even apart therefrom, which ought not to be noised abroad, I will keep silence thereon, counting such things to be sacred secrets. While I continue to keep this Oath unviolated, may it be granted to me to enjoy life and the practice of the Art, respected by all men, in all time— But should I trespass and violate this Oath, may the reverse be my lot.

Dr. Jeffrey Wiese

"Our deepest fear is not that we are inadequate. Our deepest fear is that we are powerful beyond measure. It is our light, not our darkness, that most frightens us. We ask ourselves, who am I to be brilliant, gorgeous, talented and fabulous? Actually, who are you not to be? You are the child of God. Your playing small doesn't serve the world. There's nothing enlightened about shrinking so that others won't feel insecure around you. We were born to make manifest the glory of God that is within us. It's not just in some of us; it's in everyone. And as we let our own light shine, we unconsciously give other people permission to do the same. As we are liberated from our own fear, our presence automatically liberates others."

*-Nelson Mandela, 1994 Inaugural Speech*

Your presence liberated us over the years and it continues to do so. Thank you.

"Dr. Wiese is a source of inspiration for me every day in the wards. When I get tired or grouchy, I always think how much Dr. Wiese gives of himself and his time to both us and the patients. A problem that I frequently face with patients is that I start to feel resentful of them when they are noncompliant with their physicians' plans to help them. Dr. Wiese taught me an alternate way of thinking about that - we are just "catchers in the rye." It is not for us to accept or judge patients' actions. We just help them as we know how and they must do the rest."

Jay "Disco" DiFusco

In 1741, Andry said, "The sooner you hinder a child to walk when you observe his knees begin to incline inwards it will be so much the better. And if from neglecting this precaution the leg is already crooked, you must supply as soon as possible, a small plate of iron upon the hollow side of the leg, and fasten it about the leg with a linen roller. This roller must be tighter and tighter every day until it compresses sufficiently the part that bunches out. And that this compression may not hurt it, you must put a large compress under the bandage on that part of the leg. In a word, the same method may be used in this case for recovering the shape of the leg as is used for making straight the crooked trunk of a young tree."

We wish that he would be able to change his workaholic habits and enjoy the golden years of retirement with his wife Pat. Just want you to know the old cliché is really true - this place won't be the same without you.*

NICHOLAS PEJIC

Nicholas,

"Queer little twists and quirks go into making an individual. To suppress them all and follow clock and calendar and creed until the individual is lost in the neutral gray of the host, is to be less than true to our inheritance...Lay down your own day, follow it to its noon, or you will sit in an outer hall listening to the chimes, but never reaching high enough to strike your own."

Angelo Patri

We admire you, the individual!

Love, Mom and Dad

Joe Pisano,

Thanks for your friendship, mentorship, and keen council. Congratulations on your retirement. You will be missed.

Your friend,

Dr. "D",

You make a living by what you get, but you make a life by what you give. Be thankful for the work that's ahead of you, but mostly be thankful that you are one of the few chosen to have the skill, strength, and brains to do it.

Joseph C. Pisano, Ph.D.

Instructor

Department of Physiology & Biophysics  
University of Tennessee, Memphis  
62 South Dunlap  
Memphis, Tennessee 38163

Dear Dr. Pisano:

I take great pleasure in informing you of your appointment as Assistant Professor in the Department of Physiology, Tulane University School of Medicine. I sincerely hope that you will accept our invitation to take this faculty position at our institution, thus ensuring the beginning of a remarkable thirty-five year tenure. I envision you being promoted to Associate Professor by 1972, and securing tenure in 1975. Furthermore, you will become an administrator in 1976 by assuming the directorship of the Financial Aid Office and serving as the Assistant Dean for Admissions. In 1993, you will bear the mantle of Associate Dean of Admissions, and you will hold this title until retirement.

My first enticement for you will be the ability to work with W. Clifford Newman for the next twenty-five years as a teacher, researcher, and administrator until he meets his untimely death in 1992. You and Cliff will be the inseparable duo that will shape and inspire every medical school class at Tulane from this date until you retire thirty-five years later. Though you will spend the last ten years apart from Cliff, I assure you the first twenty-five years of memories will serve as a panacea for the pain and the solitude of the last ten.

Secondly, I give you the working relationships and friendships of Wally Tomlinson, Ed Peebles, Bob Vaupel, Larry Baudoin, Marc Kahn, Jim Corrigan, John Walsh, Bill Browder, Leon Walker, Gerald Kirby, Mary Anderson, James Fischer, Charlie Dunlap, Leon Weisberg, Blackwell Evans, April O'Quinn, Anna Epps, Irwin Cohen, Marty Litwin, Rune Stjernholm, Gene Hamori, Floyd and Judy Domer, Barbara Beckman, Jim Jeter, Charley Haddad, Kevin Krane, Katie Knight, Jim Hamlin, Dan Winstead, Phil Kadowitz, Rodney Davis, Phil Daroca and Raju Thomas, to name but a few.

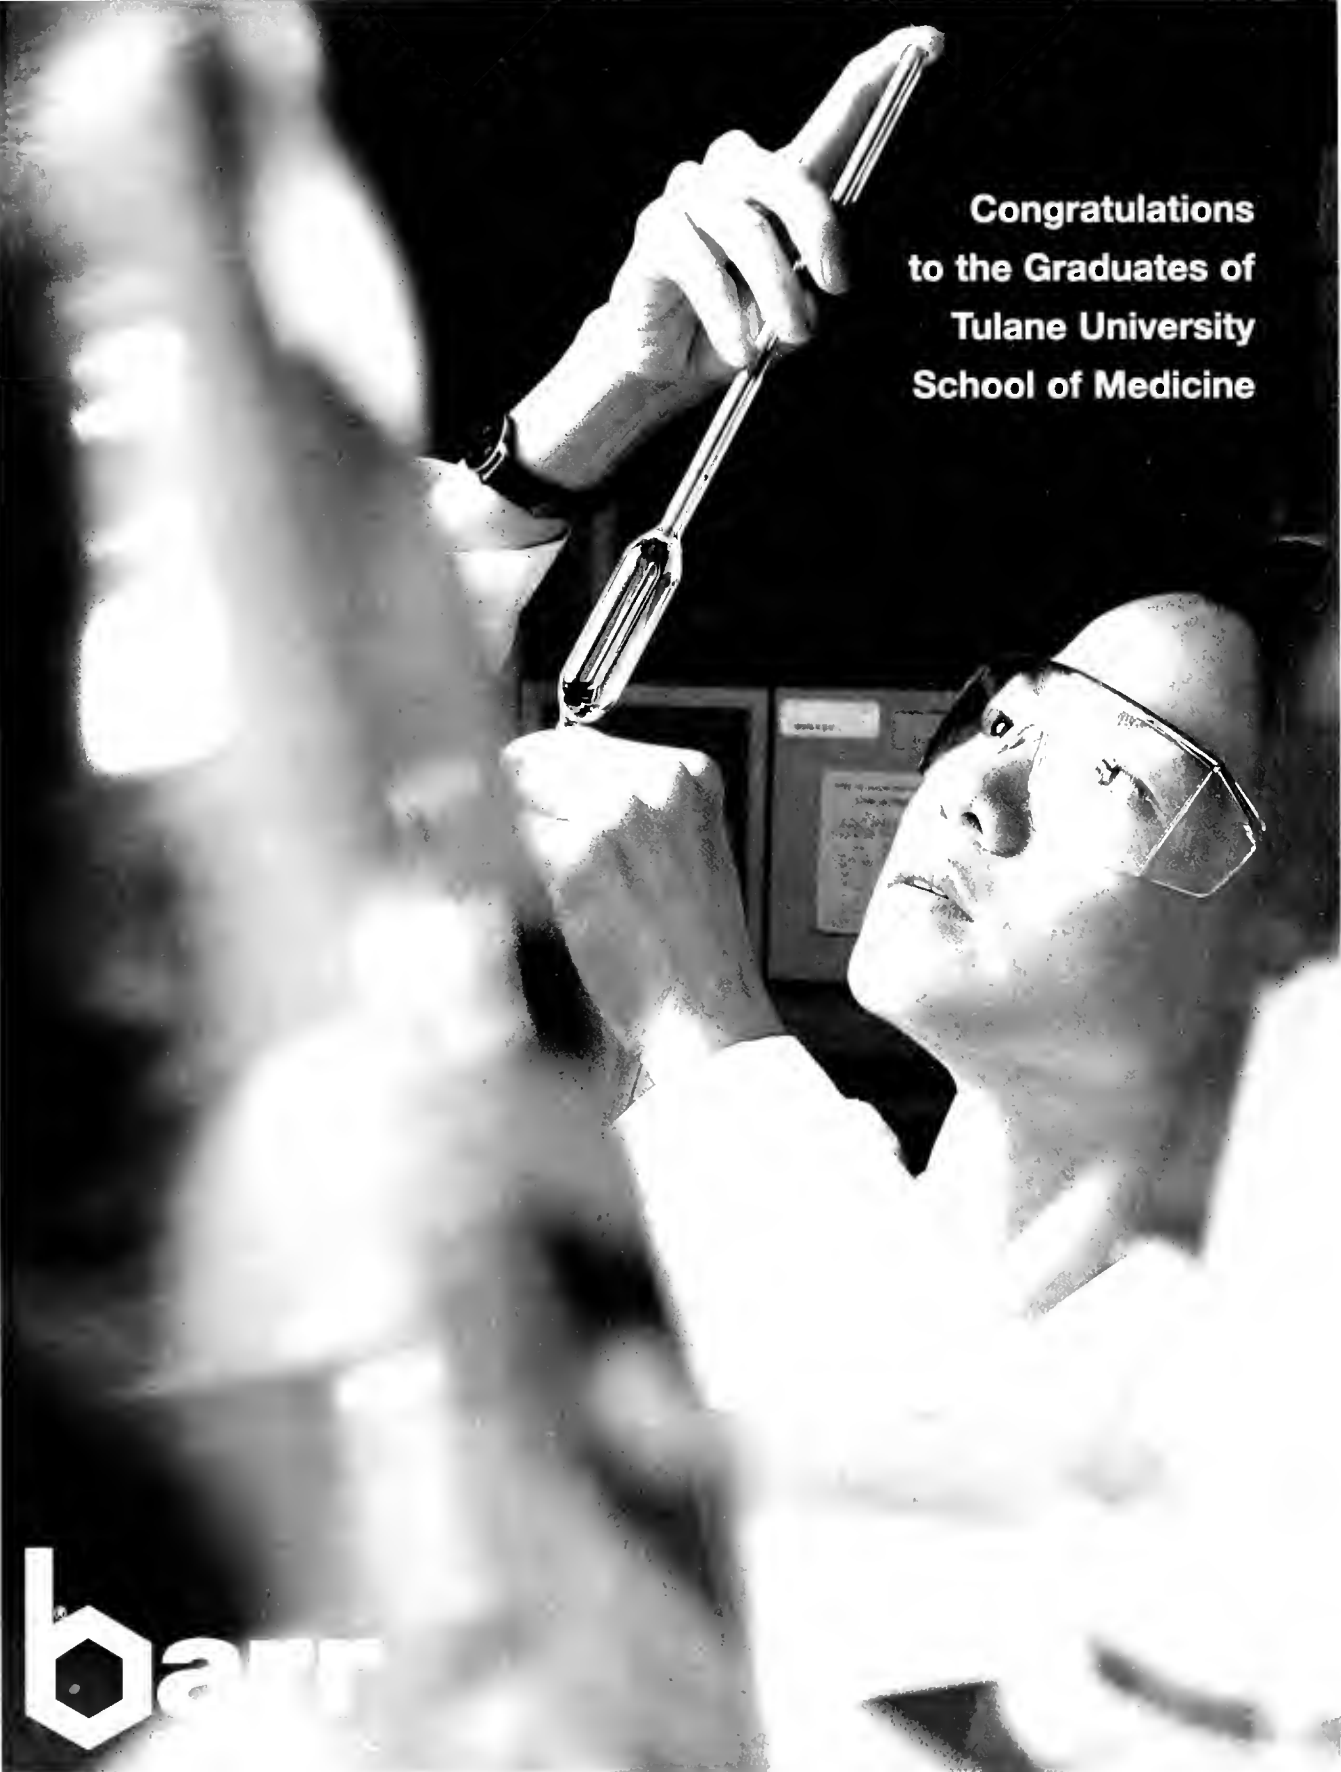

Finally, over 5,250 medical students will be blessed with your teaching, your creative financial aid packages, your acceptance letters, and the luxury of having the "admissions office" open daily from 5:00 AM onwards for advice, emergency loan checks, a cigarette (or two...), and a friendly voice and receptive ear. You will be an instrumental force behind the highly successful MEDREP program for 18 years for disadvantaged students. I can assure you numerous teaching accolades from the Owl Club, the intellectual, personal, and financial gratification of countless students, and the reality that the last day you walk through our hallways, our school will be changed forever. For after thirty-five years, you will serve as the embodiment of all that is right and good at our medical school.

Thank you.

Godspeed and I remain,

Alumnus
